## Q1 2016 Interim Report

## Interim Report <br> JANUARY - MARCH 2016

- Sales increased by 6 percent to $3,557 \operatorname{MSEK}(3,368)$ for the first quarter. In local currencies, sales increased by 7 percent.
- Operating profit from product areas ${ }^{1)}$ increased by 8 percent to 939 MSEK (866) for the first quarter. In local currencies, operating profit from product areas ${ }^{1)}$ increased by 10 percent.
- Growth of sales and operating profit from product areas ${ }^{11}$ was positively affected by lower trade destocking in Scandinavia in 2016 than in 2015.
- Operating profit ${ }^{2}$ amounted to $\mathbf{1 , 7 1 1} \operatorname{MSEK}(1,014)$ for the first quarter, including larger one-time items of 704 MSEK relating to the capital gains of the previously announced partial divestment of STG and the divestment of distribution center real estate.
- Earnings per share amounted to 7.44 SEK (3.68) for the first quarter. Adjusted earnings per share increased by 9 percent to 3.71 SEK (3.40) ${ }^{3}$.
- As previously announced, STG was listed on Nasdaq Copenhagen during the first quarter and in connection with the listing, Swedish Match reduced its ownership in STG from 49 percent to 31.1 percent.

1) Operating profit for Swedish Match product areas, which excludes larger one-time items and share of net profit in STG.
2) Operating profit for the Group includes larger one-time items and share of net profit in STG. Swedish Match's share of net profit in STG is reported with a one quarter lag. For the first quarter 2016, Swedish Match's reported share of STG's net profit represents 31.1 percent of STG's fourth quarter 2015 net profit.
3) Adjusted for Swedish Match's larger one-time items in 2016 and the adjustment of share of profit in STG for the reassessment of useful lives of certain assets (primarily trademarks) in the first quarter 2015.

## CEO Lars Dahlgren comments:

## Solid growth in our two largest product areas

Swedish Match made a good start to 2016 and several of the positive trends that we saw during 2015 have continued. In Scandinavia, the snus market demonstrated strong volume growth, and despite a market share loss of about one percentage point, Swedish Match's volumes grew at a healthy rate on an underlying basis. In the US, the cigar market continued to grow, and once again Swedish Match delivered growth well in excess of the category.
With the completion of the IPO of Scandinavian Tobacco Group (STG), we increased focus on our core and generated substantial cash proceeds which will be paid out to our shareholders by means of an extra dividend. During the quarter we completed a small acquisition of patent rights to a nicotine pouch product without tobacco that we have been test marketing under license on a small scale with promising results in the US. In March we also began our first new international smokeless initiative following the dissolution of the SMPM International joint venture, as we selectively launched a modern form of chewing tobacco under the General brand name in Switzerland. In February we inaugurated our new distribution center in Kungsängen outside Stockholm. The two former distribution centers have been closed and the building in Solna has been sold.

Our reported growth in sales and operating profit was very strong, but it should be noted that the comparability of our financial results has been affected by several items of a non-recurring or temporary nature. The STG IPO and the sale of the Solna building generated tax exempt capital gains, which have been recorded as larger one-time items. Within operating profit from product areas, Snus and moist snuff particularly benefitted from certain timing effects. In Scandinavia, the unwinding of year-end hoarding in the trade has negatively affected shipment volumes to a larger extent in the first quarter of 2015, and the operating loss for snus outside Scandinavia was lower in the first quarter of 2016 than our expected run-rate for the remainder of the year. On the other hand, currency translation effects were negative for both sales and operating profit as the marginally stronger USD had a limited positive effect which was more than offset by negative effects from the weaker Norwegian krone and the weaker Brazilian real.

On an underlying basis (adjusted for currency translation and items of a temporary nature) operating profit grew for all product areas except for Lights. For Snus and moist snuff there was an underlying improvement of the results for both Scandinavia and the US. For Other tobacco products the continued strong momentum for cigars more than compensated for a relatively weak quarter for chewing tobacco. For Lights the decline in underlying operating profit was driven by poor volumes for matches.

In summary, the first quarter marks a promising start for 2016, and I look forward to continued progress for the remainder of the year and beyond.

1) Excluding larger one-time items and share of net profit in STG.
2) Including larger one-time items and share of net profit in STG. Larger one-time items for 2016 include the net proceeds from the sale of shares in STG of 560 MSEK and proceeds from the sale of a distribution facility of 145 MSEK. The first quarter 2016 share of net profit in STG is reported on a one quarter lag. Larger one-time items for 2015 include costs of 42 MSEK (33 MSEK after tax) on the relocation of distribution facilities. The full year 2015 includes only the first nine months of net profit in STG due to transition to a one quarter lag reporting. Swedish Match's share of net profit in STG for the first nine months of 2015 includes an adjustment of 56 MSEK relating to 2014 due to a reassessment of useful lives of certain intangible and tangible assets (primarily trademarks). See Note 3.
3) First quarter 2016 is adjusted for Swedish Match larger one-time items. First quarter 2015 is adjusted for the above-mentioned STG reassessment of useful lives. Full year 2015 (excluding share of STG's net profit for the fourth quarter 2015 due to changed reporting) is adjusted for the above-mentioned larger one-time items and STG reassessment of useful lives.

## The first quarter

(Note: Comments below refer to the comparison between the first quarter 2016 vs. the first quarter prior year).

## Sales

Sales grew by 6 percent to 3,557 MSEK $(3,368)$. Currency translation has affected the sales comparison negatively by 32 MSEK. Sales increased for all product areas except for Lights. In local currencies, sales increased by 7 percent. For Snus and moist snuff and Other operations, growth in sales was positively affected by lower trade destocking in Scandinavia in 2016 than in 2015. Adjusted for trade destocking in Scandinavia and currency translation, total Group sales increased by more than 4 percent.

## Earnings

Operating profit from product areas increased by 8 percent to 939 MSEK (866). Operating profit increased for Snus and moist snuff and Other tobacco products but declined for Lights. In local currencies, operating profit from product areas increased by 10 percent. Growth in operating profit was affected by the above mentioned lower trade destocking in Scandinavia.
Operating profit, including the share of net profit in STG on a one quarter lag and larger one-time items amounted to 1,711 MSEK ( 1,014 ). During the quarter, the non-taxable capital gains on the partial sale of STG in conjunction with the IPO and the previously announced sale of distribution real estate in Sweden were recognized as larger one-time items of 560 MSEK and 145 MSEK, respectively. Currency translation has affected the comparison of the operating profit negatively by 11 MSEK.
The Group's net finance cost amounted to 107 MSEK (114) and income tax expense amounted to 200 MSEK (179), corresponding to a reported tax rate of 12.5 percent (19.8). The tax rate, excluding associated companies and joint ventures and non-taxable larger one-time items, was 24.0 percent (23.5).
Profit for the period amounted to 1,404 MSEK (721).
Earnings per share (EPS) for the first quarter amounted to 7.44 SEK (3.68). EPS increased by 9 percent to 3.71 SEK (3.40) when adjusted for the larger one-time items in 2016 as well as the adjustment in 2015 for the STG reassessment of useful lives of certain assets (primarily trademarks).

## General celebrates 150 years

The history of the General snus brand goes back to 1866 when entrepreneur Johan A. Boman started searching for what he called the "the perfect snus". It took him four years of development before he was satisfied with his recipe. This was the start of the history of a snus brand which still lives on today.
At a fine dinner party Johan A. Boman was said to have expressed his struggle for perfection: "I can't settle for anything second-rate. I wish I could, life would be much easier if I could. But second-rate quality takes all the pleasure away from me".

When Boman couldn't find a snus that lived up to his personal standards, he took things into his own hands. He travelled around the world collecting the best tobacco leaves he could find and began experimenting with various recipe combinations. He even considered the production process.
In 1866, after four years of experimenting to develop the taste he wanted, he finally found a recipe that he was satisfied with - a blend of 22 different tobaccos topped with a drop of bergamot oil.

With the heritage of Johan A. Boman's General snus as a base the brand continues to develop and is available today in different varieties both on the Swedish market and internationally. The flavor is spicy with its touch of pepper, and also contains a hint of citrus which originates from the careful seasoning that includes natural citrus oils.

## Snus and moist snuff

## First quarter highlights:

- Strong market growth and underlying volume development in Scandinavia
- Sales growth in Scandinavia positively affected by differences in trade destocking
- Negative currency impact from the weakened Norwegian krone
- Reduced operating loss for snus expansion outside Scandinavia

## The first quarter

(Note: Comments below refer to the comparison between the first quarter 2016 vs. the first quarter prior year).
Reported sales for Snus and moist snuff increased by 5 percent, and by 6 percent in local currencies. The sales growth was positively impacted by lower trade destocking in 2016 than in 2015 . Underlying sales grew both in Scandinavia and the US. Operating profit growth was also positively affected by destocking effects, as well as a reduced loss for international snus expansion, but negatively affected by the weakened Norwegian krone. Operating profit grew, adjusted for the aforementioned effects. The underlying growth in operating profit was primarily driven by higher volumes in Scandinavia and a higher net average sales price in the US. The total net operating loss for snus expansion outside Scandinavia amounted to 49 MSEK (80) and the reduction of the operating loss was the result of lower marketing spending and improved gross profit. The reduction in marketing spending was partly due to timing. The lower operating loss related to the international snus expansion was the main driver behind the higher operating margin for the product area.
In Scandinavia, both the Swedish and Norwegian markets grew strongly in the quarter. Swedish Match estimates that the total Scandinavian market grew by more than 5 percent on an underlying basis. Swedish Match's shipment volumes measured in number of cans were up 8 percent, and are estimated to have been up by close to 4 percent on an underlying basis. Swedish Match continued to grow share and volume for its XRANGE snus series and also gained market share within the value price segment compared to the prior year period. In Sweden, Swedish Match's volume market share was somewhat down both compared to previous quarter and prior year period. The value segment's share of the market was in line with the previous quarter but slightly up versus the prior year period. In Norway, Swedish Match lost market share both compared to the previous quarter and the prior year's first quarter. Underlying sales in Scandinavia (adjusted for trade destocking and currency translation) increased at a somewhat slower pace than the volume

development as negative mix effects were only partially offset by strong volumes and list price increases. The increase in operating profit was driven by the same parameters as sales.

For General snus in the US, sales continued to increase due to a combination of higher volumes and better realized pricing. Operating loss in US dollars was lower due to the improved gross profit and to significantly lower marketing spending for the quarter mainly due to timing effects.

For the US moist snuff business, there were fewer promotions than in the prior year, which negatively impacted the volume development but, along with list price increases, contributed to a notably higher average selling price. Sales and operating profit grew in local currency.

## Other tobacco products (cigars and chewing tobacco)

## First quarter highlights:

- Continued good performance for cigars
- Large volume declines in chewing tobacco for the quarter
- Minimal positive currency effects on reported sales and operating profit

Key data

## The first quarter

(Note: Comments below refer to the comparison between the first quarter 2016 vs. the first quarter prior year).
Sales and operating profit for Other tobacco products grew both as reported and in local currency. In local currency, sales increased by 5 percent and operating profit increased by 3 percent. The currency effects were only slightly positive as the US dollar average exchange rate was almost on par with the prior year period.

Cigar volumes continued to grow and were up by 10 percent. The US cigar market remained highly competitive but Swedish Match continued to strengthen its presence within the natural leaf segment and in the value segment. Swedish Match's Game and 1882 natural rolled leaf brands as well as the value brand Jackpot showed especially strong growth in the quarter. Sales and operating profit in local currency increased in line with volume development as positive mix effects partially offset negative price effects.

Chewing tobacco shipments (excluding contract manufacturing volumes) were down by 9 percent and year on year price increases could not fully offset this volume decline. Operating profit in local currency declined due to the lower volumes and somewhat higher operating costs and included a minor operating loss for sales of chew bags in Switzerland.

## Lights (matches, lighters and complementary products)

## First quarter highlights:

- Continued negative effects from a weak Brazilian real and lower volumes for matches
- Relatively low lighter volumes but strong mix

## The first quarter

(Note: Comments below refer to the comparison between the first quarter 2016 vs. the first quarter prior year).
Sales were down primarily due to lower volumes for matches on a relatively strong prior year period and the substantially weaker Brazilian real. Sales for lighters were slightly down, as lower volumes were largely compensated by a strong mix, and sales for complementary products were up. Operating profit declined due to the lower volumes and higher production costs for matches as well as some costs of a temporary nature for matches.

## Swedish Match shipment volumes, worldwide

## Other operations

Other operations consist of the distribution of tobacco products on the Swedish market and corporate overhead costs.

## The first quarter

Sales in Other operations for the first quarter amounted to 1,014 MSEK (912). Operating loss for Other operations was 24 MSEK (29). Sales in Other operations for prior year period were negatively affected by destocking following hoarding at the end of 2014.
The new distribution center was opened according to plan in the quarter and the two former distribution centers have been closed. At the end of March, the previously announced sale of the Solna distribution center was closed and a non-taxable capital gain of 145 MSEK was recognized as a larger one-time item.

## Scandinavian Tobacco Group

Scandinavian Tobacco Group (STG) is a world leading manufacturer of cigars and pipe tobacco. Through February 9, 2016, Swedish Match owned 49 percent (49 million shares) of STG. On February 10, 2016, STG was listed on Nasdaq Copenhagen and in conjunction with the listing Swedish Match sold 17.9 million shares including a partial exercise of an overallotment option, which resulted in that Swedish Match now holds 31.1 million shares and the ownership in STG amounts to 31.1 percent. According to the IPO underwriting agreement, there is a lock-in period for the selling shareholders which expires on August 8, 2016.

The final offer price in the IPO was set at 100 DKK per share corresponded to a market capitalization of STG of DKK 10 billion. Swedish Match's proceeds, net of transaction costs, from the sale of STG shares in the IPO amounted to 2,172 MSEK. The proceeds will be distributed to Swedish Match's shareholders in the form of a special dividend of 12.00 SEK per share ( 2,258 MSEK based on the number of outstanding shares per March 31, 2016). The tax-free capital gain from the partial divestment of STG in conjunction with the IPO amounted to 560 MSEK and was recognized as a larger one-time item in the first quarter 2016.
Swedish Match has, from the reporting period ending December 31, 2015, started to report its share of STG's net profit as well as its share of equity with a one quarter lag. For the first quarter 2016, Swedish Match's reported share of STG's net profit amounted to 68 MSEK (148). For the first quarter 2016, Swedish Match's reported share of net profit in STG represented a 31.1 percent share of STG's net profit for the fourth quarter 2015. For the comparison period, Swedish Match's reported share of net profit in STG represented a 49 percent share of STG's net profit for the first quarter 2015 and also included a positive adjustment of 56 MSEK for a reassessment of useful lives of certain assets (primarily trademarks) relating to 2014. The decrease in reported share of net profit in STG is a result of the decreased ownership and the comparison period being affected by a positive adjustment. STG's reported fourth quarter 2015 EBITDA and net profit was in line with the fourth quarter 2014 but the underlying EBITDA and net profit improved.

Please see Note 3 for information on Swedish Match's reporting of STG.

## Financing and cash flow

Cash flow from operating activities for the first quarter amounted to 792 MSEK (963). The cash flow from operations decreased due to the timing of dividend received from STG. A dividend from STG of 156 MDKK will be received during the second quarter (based on a 31.1 percent ownership) whereas a dividend from STG of 209 MDKK, corresponding to 261 MSEK, was received during the first quarter in 2015 (based on a 49 percent ownership).

During the first quarter, Swedish Match had a positive net cash flow from investing activities. Swedish Match received 2,172 MSEK from the partial divestment of STG in conjunction with the IPO and another 145 MSEK from the sale of a distribution center. Investments in property, plant and equipment as well as in intangible assets increased to 202 MSEK (57), affected by an investment in patent rights for a nicotine pouch product without tobacco. For the full year, investments in property, plant and equipment are expected to be in line with prior year.
Net finance cost for the first quarter declined to 107 MSEK (114), mainly due to lower interest rate on debt.

The net debt as of March 31, 2016 amounted to 5,522 MSEK compared to 7,548 MSEK at March 31, 2015 and 7,922 MSEK at December 31, 2015. The decrease in the net debt is due to the inflow of the proceeds of 2,172 MSEK from the partial sale of STG which during the second quarter will be paid to Swedish Match's shareholders in the form of a special dividend of 12.00 SEK per share ( 2,258 MSEK based on the number of outstanding shares per March 31, 2016).
During the first quarter, new bond loans of 497 MSEK were issued. Repayments of bond loans for the same period amounted to 363 MSEK. As of March 31, 2016 Swedish Match had 8,198 MSEK of interest bearing debt excluding retirement benefit obligations compared to 8,064 MSEK at December 31, 2015 and 8,563 MSEK at March 31, 2015. During the remainder of 2016, 310 MSEK of this debt falls due for payment.
As of March 31, 2016, Swedish Match had 1,500 MSEK in unutilized committed credit lines. Cash and cash equivalents amounted to 4,441 MSEK at the end of the period, compared to 1,732 MSEK at December 31, 2015.

During the first quarter, Swedish Match made share repurchases of 199 MSEK.

## Number of shares

During the first quarter, Swedish Match repurchased 0.7 million shares for 199 MSEK at an average price of 280.33 SEK, following authorization from the Annual General Meeting held in 2015. Total shares bought back by Swedish Match since the buyback program started have been repurchased at an average price of 114.10 SEK.

As per March 31, 2016 Swedish Match held 8.3 million shares, corresponding to 4.22 percent of the total number of shares. The number of shares outstanding, net, as per March 31, 2016, amounted to 188.2 million.

During the first quarter 2015, all remaining options issued by Swedish Match, as part of its former option program, were exercised and no further options are outstanding.

## Annual General Meeting and repurchase of own shares

The Annual General Meeting held on April 28, 2016, re-elected Charles A. Blixt, Andrew Cripps, Jacqueline Hoogerbrugge, Conny Karlsson, Wenche Rolfsen, Meg Tivéus and Joakim Westh as Board members. Conny Karlsson was re-elected Chairman of the Board and Andrew Cripps was re-elected Deputy Chairman of the Board.

The Annual General Meeting approved the Board's proposal of an ordinary dividend in the amount of 8.00 SEK per share and a special dividend of 12.00 SEK per share, in total 20.00 SEK per share, to be paid to the shareholders, in a total amount of 3,764 MSEK, based on the number of outstanding shares as per March 31, 2016. In addition, the Meeting resolved to reduce the share capital by means of withdrawal of 7,750,000 shares in the Company, held in treasury, with a simultaneous bonus issue, without issuing any new shares, of a corresponding amount to restore the share capital. The total number of registered shares in the Company before the withdrawal of shares was 196.5 million.

The 2016 Annual General Meeting further authorized the Board of Directors to acquire the Company's own shares, including the possibility to implement a repurchase program in accordance with the Commission Regulation (EC) No 2273/2003 of December 22, 2003 ("EC-Regulation"), a mandate which the Board now utilizes. The repurchase of own shares shall meet the following conditions. The shares shall be acquired on Nasdaq Stockholm in accordance with the rules regarding purchase of own shares as set out in the ECRegulation and the Nasdaq Stockholm's Rule Book for Issuers. Further, the shares may be acquired on one or several occasions from May 6, 2016 up until the next Annual General Meeting, provided that the Company's holding does not at any time exceed 10 percent of all shares in the Company. In one day, a maximum of 25 percent of the average daily volume may be purchased. Repurchases shall be made at a price within the price interval registered at any given time, i.e. the interval between the highest bid price and lowest selling price. The price may not exceed the higher of the price of the last independent trade and the highest current independent bid price. Payment for the shares shall be in cash. As per May 4, 2016, Swedish Match holds 8,295,632 treasury shares.

The purpose of the repurchasing right is primarily to enable Swedish Match to adapt its capital structure to its capital needs over time, and thereby contribute to an increased shareholder value.

## Other event

On April 6, the Swedish Parliament adopted a government bill for transposing of the EU tobacco products directive (TPD) into Swedish law with the effective date May 20, 2016. For snus the new law includes the requirement of two warning labels instead of one, as today. The new warning labels will include the text: "This product harms your health and is addictive". The Public Health Agency of Sweden has communicated that a transition period shall apply and that the date after which snus cans with the current warning label may no longer be manufactured shall be August 31. In addition to changed warning labels for snus, the new law among other requirements stipulates some increased reporting requirements to authorities for snus manufacturers.

## Outlook

For 2016, on a full year basis, we expect Scandinavian snus as well as US moist snuff consumption to continue to grow as measured in number of cans. In our Scandinavian snus business, the average net selling price per can is expected to decline slightly versus prior year as modest price increases are offset by the effect of the weakened Norwegian krone, mix effects attributable to the successful launch of XRANGE, and growth of the value segment. Since December 2015 the competitive activity level in the Swedish snus market has increased and we expect it to remain high for the remainder of the year. For our US moist snuff business, we expect higher prices to more than compensate for negative mix effects during the year. We will continue to work hard to defend our market shares in both Scandinavia and in the US.

For cigars in the US, Swedish Match expects the market to continue to grow in 2016 but to remain highly competitive. Swedish Match expects the US Food and Drug Administration (FDA) to begin regulating cigars during the year and in conjunction with this Swedish Match, like the rest of the cigar industry, will be subject to user fees to the FDA.

Swedish Match will continue to invest in growth outside Scandinavia in 2016. We expect a reduced operating loss as the SMPM International joint venture has been dissolved and the US snus business is expected to continue to grow and to deliver increased gross profit.

Swedish Match generates a substantial share of its sales and operating profit in the US. During 2015, the stronger US dollar compared to 2014 had a significant positive effect on both sales and operating profit growth. For 2016, Swedish Match expects a much less pronounced currency translation impact.

The effective corporate tax rate, excluding associated companies and non-taxable larger one-time items, is expected to be somewhat higher for 2016 than for 2015.

The Company maintains its financial strategy and dividend policy, and we remain committed to returning cash not needed in operations to shareholders.

## Risk factors

Swedish Match faces intense competition in all of its markets and for each of its products and such competition may increase in the future. In order to be successful the Group must develop products and brands that resonate with changing consumer trends, and price and promote its brands competitively. Restrictions on advertising and promotion may, however, make it more difficult to counteract loss of consumer loyalty. Competitors may develop and promote new products which could be successful, and could thereby have an adverse effect on Swedish Match results of operations.

Swedish Match has a substantial part of its production and sales in the US and also operations in Brazil, the Dominican Republic, Norway and EMU member countries. Consequently, changes in exchange rates of the euro, Norwegian krone, Brazilian real, the Dominican peso and in particular the US dollar may adversely affect the Group's results of operations, cash flow, financial condition or relative price competitiveness in the future. Such effects may occur both in local currencies and when such local currencies are translated into Swedish currency for purposes of financial reporting.

Regulatory and fiscal changes related to tobacco and other taxes, as well as to the marketing, sale and consumption of tobacco products, in the countries where the Group is operating may have an adverse effect on Swedish Match results of operations.

For a further description of risk factors affecting Swedish Match, see the Report of the Board of Directors in the published Swedish Match annual report for 2015.

## Swedish Match AB (publ)

Swedish Match $A B$ (publ) is the Parent Company of the Swedish Match Group. The main sources of income for the Parent Company are dividends and Group contributions from subsidiaries.

Sales in the Parent Company for the first quarter amounted to 12 MSEK (13). Profit before income tax amounted to 641 MSEK (loss 198) and net profit for the quarter amounted to 684 MSEK (loss 144). The higher net profit for the first quarter mainly pertains to timing differences in dividends from subsidiaries compared to previous year.
During the period, the Parent Company received dividends of 856 MSEK (83).
Part of the Group's treasury operations are within the operations of the Parent Company including the major part of the Group's external borrowings. The majority of these loans have fixed interest rates.
During the first quarter repayments of bond loans amounted to 363 MSEK and new bond loans of 497 MSEK were issued. During the period, the Parent Company made share repurchases of 0.7 million (1.1) shares for 199 MSEK (298). During the first quarter of the prior year, 0.7 million treasury shares were sold for 141 MSEK.

No capital expenditures on tangible assets have been recognized during the period. During prior year's first quarter, 1 MSEK was capitalized as tangible fixed assets.

## Forward-looking information

This report contains forward-looking information based on the current expectation of the Swedish Match Group's management. Although management deems that the expectations presented by such forwardlooking information are reasonable, no guarantee can be given that these expectations will prove correct. Accordingly, the actual future outcome could vary considerably compared to that stated in the forwardlooking information, due to such factors as changed market conditions for Swedish Match's products and more general factors such as business cycles, markets and competition, changes in legal requirements or other political measures, and fluctuation in exchange rates.

## Additional information

This report has not been reviewed by the Company's auditors. The January-June 2016 report will be released on July 22, 2016.

| Swedish Match's share of net profit | 68 | 91 | $-\mathbf{- 2 5}$ | 304 |
| Change in estimate of useful lives | - | 56 |  | 56 |
| Swedish Match's reported share of net profit | 68 | 148 | -54 | $\mathbf{3 6 0}$ |

1) Swedish Match's share of STG's net profit in the first quarter 2016 is reported on a one quarter lag, as a consequence of STG becoming a publicly listed company.
2) Swedish Match's share of STG net profit for the full year 2015 includes only the first nine months of 2015, due to STG's full year report being released after Swedish Match released its 2015 full year report. Due to transition of reporting of Swedish Match's share of STG's net profit to a one quarter lag, no net profit from STG was recognized for the fourth quarter of 2015.

Swedish Match has, from the reporting period ending December 31, 2015, started to report its share of STG's net profit as well as its share of equity with a one quarter lag. Swedish Match's first quarter 2016 financial results thereby include its share of STG's fourth quarter 2015 net profit, based on the publicly issued 2015 full year results of STG. This share has been affected by a reduction in share ownership from 49.0 percent to 31.1 percent, as Swedish Match sold 17.9 million shares in conjunction with the listing of STG on Nasdaq Copenhagen.
For the first quarter 2016, Swedish Match's reported share of net profit in STG represented a 31.1 percent share of STG's net profit for the fourth quarter 2015. For the comparison period, Swedish Match's reported share of net profit in STG represented a 49 percent share of STG's net profit for the first quarter 2015 but also included a positive adjustment of 56 MSEK for a reassessment of useful lives of primarily trademarks relating to 2014. The decrease in reported share of net profit in STG is a result of the decreased ownership and the comparison period being affected by the positive adjustment.
For the full year 2015, Swedish Match's reported share of STG's net profit was affected by the absence of reporting of STG's net profit for the fourth quarter, due to transition to the one quarter lag reporting, as well as the adjustment relating to the above mentioned reassessment of useful lives.
Swedish Match reported, up until September 2015, its share of STG's net profit and equity based on STG's reporting for the same financial period. STG's result, on which Swedish Match has based its reporting, has for some reporting periods been partly based on estimates awaiting finalization. Any differences between such estimates and the actual result of STG for that period have been adjusted in the following reporting period.
STG's reported fourth quarter 2015 EBITDA and net profit was in line with the fourth quarter 2014 but the underlying EBITDA and net profit improved. See www.st-group.com for more information on STG's 2015 fourth quarter and full year results.

Note 4 - Carrying value and fair value
The following table shows carrying value and fair value for financial instruments per March 31, 2016.

## Carrying value and fair value

| MSEK | Items carried <br> at fair value <br> via the income <br> statement | Loans and <br> receivables | Other <br> financial <br> liabilities | Cash flow <br> hedges | Total <br> carrying <br> value | Fair value |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Trade receivables | - | 1,369 | - | - | 1,369 | 1,369 |
| Non-current receivables | - | - | - | 311 | 311 | 311 |
| Cash and cash equivalents | - | 4,441 | - | - | 4,441 | 4,441 |
| Total assets | - | $\mathbf{5 , 8 1 0}$ | - | $\mathbf{3 1 1}$ | $\mathbf{6 , 1 2 1}$ | $\mathbf{6 , 1 2 1}$ |
| Loans and borrowings | - | - | 8,397 | - | 8,397 | 8,896 |
| Other liabilities | 23 | - | - | 184 | 207 | 207 |
| Trade payables | - | - | 514 | - | 514 | 514 |
| Total liabilities | $\mathbf{2 3}$ | - | $\mathbf{8 , 9 1 1}$ | $\mathbf{1 8 4}$ | $\mathbf{9 , 1 1 8}$ | $\mathbf{9 , 6 1 7}$ |

All items valued at fair value in the balance sheet are considered to be included in level 2 within the fair value hierarchy. No transfer in or out of level 2 has been made during the first quarter 2016.

The recognized amounts are regarded as reasonable estimates for all items measured at carrying value in the balance sheet, except for loans and borrowings, since these amounts have a long time to maturity. The fair value of loans and borrowings has been calculated by discounting future cash flow. Total nominal amount of outstanding derivatives (cross currency and interest rate swaps) is $5,148 \mathrm{MSEK}$, all in cash flow hedges.
