OUR VISION

A WORLD WITHOUT CIGARETTES

We create shareholder value by offering tobacco consumers enjoyable products of superior quality in a responsible way. By providing products that are recognized as safer alternatives to cigarettes, we can contribute significantly to improved public health.
Among the smokeless tobacco products on the market, products with low levels of nitrosamines, such as Swedish snus, are considerably less hazardous than cigarettes*.

GOTHIATEK®

GOTHIATEK® is the world-unique quality standard pursued by Swedish Match since 2000. The uncompromising requirements that GOTHIATEK® imposes on the company’s snus products are based on decades of research and development, with product safety and consumer protection as the key targets. GOTHIATEK® is based on three cornerstones:

- Consumer care – through uniquely low limits for undesirable substances
- Quality – through 100% control from seed to can
- Openness – through information about the company’s products and research results

MATCHTEK®

The Swedish matches we manufacture and sell meet the world’s highest quality and safety requirements. The MATCHTEK® standard is an extension of the existing European match standard EN 1783:1997 (performance requirements, safety and classification). The restrictions are stricter than those in the EN 1783:1997, and the methods for analysis and testing are more complex. Our complying with this standard means our matches have been subject to rigorous quality control tests.
