

EN16: Total direct and indirect greenhouse gas emissions by weight

NOTE: Comparable figures (from continuing operations)

All CO₂ / Greenhouse gas reporting is according to CDP protocols.

	2010	2009	2008
Total greenhouse gas emissions by weight [metric Tons]	38234	37037	38079
Total greenhouse gas emissions by weight and direct/indirect [metric Tons]	2010	2009	2008
Total <u>direct</u> greenhouse gas emissions	11627	10672	11542
Total <u>indirect</u> greenhouse gas emissions	26607	26365	26537
Total <u>direct and indirect</u> greenhouse gas emissions	38234	37037	38079
Total greenhouse gas emissions by weight and direct/indirect [%]	2010	2009	2008
Total <u>direct</u> greenhouse gas emissions	30%	29%	30%
Total <u>indirect</u> greenhouse gas emissions	70%	71%	70%
Total <u>direct and indirect</u> greenhouse gas emissions	100%	100%	100%
Total direct greenhouse gas emissions by weight and source [metric Tons]	2010	2009	2008
Generation of electricity, heat, or steam	9968	9431	9346
Other combustion processes such as flaring	-	-	-
Physical or chemical processing	-	-	-
Transportation of materials, products, and waste	1659	1241	2196
Venting		-	-
Fugitive emissions		-	-
Total direct greenhouse gas emissions by weight and source [metric Tons]	11627	10672	11542
Total direct greenhouse gas emissions by weight and source [%]	2010	2009	2008
Generation of electricity, heat, or steam	86%	88%	81%
Other combustion processes such as flaring		-	-
Physical or chemical processing		-	-
Transportation of materials, products, and waste	14%	12%	19%
Venting		-	-
Fugitive emissions		-	-
Total direct greenhouse gas emissions by weight and source [%]	100%	100%	100%
